Summary of Research UK

Funded by the Erasmus+ Programme of the European Union

COUNTRY RESEARCH ON FUTURE EMPLOYMENTS

According to the research that was conducted simultaneously in Turkey, Germany,Netherlands, Romania, UK and Austria by the co-operating partners of the project, technological developments in digitalization, mechanization and robotics will have a deep impact on the job market in the near future. Despite the current low unemployment rates in richer countries, this rate may rise if not carefully approached with the advancements in the technology.

Smart Aspirations Future Employment+

Project Nr: 2018-3-UK01-KA205-060063

The research shows that more detailed approaches must be developed and implemented not only on the national level but also on the international level through collaboration.
